- Verticals – LE, public safety, corporations
- Exclusive - agencies and vetted organizations

What we do...

Get the right information to the right people quickly and efficiently while protecting privacy.

Secured Communications

We are not an app service.

We are an *enterprise solution* for secure encrypted Internet, PC and mobile communication.

We are the *secure alternative* to email, group messaging, video, image, audio and file sharing.

Core Focus

Privacy

Protect communication privacy while making it simpler, faster and more effective to connect, communicate and collaborate with contacts and groups.

Productivity

Increase productivity, decrease internal email, reduce meetings, expand mobile connectivity, provide interoperability and protect information.

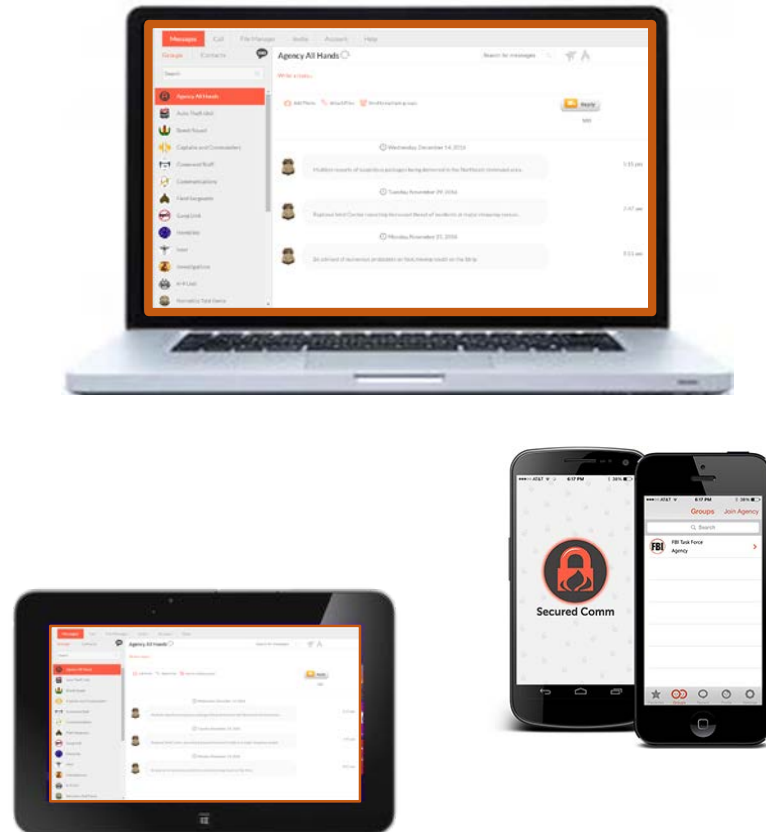

A Better Way to...

- Share more information, faster, to the right people.
- Protect communication privacy from cyber threats.
- Communicate interoperably between agencies, companies and groups.
- Manage BYOD communication.
- Firewall official communication from personal data.
- Utilize and expand mobile productivity.
- Manage and control internal communication.
