

Established in 2015, we are a wholly owned subsidiary of Chenega Corporation, an Alaska Native Corporation (ANC) specializing in full life cycle training encompassing curriculum development, in-classroom, virtual and distance learning, and simulation education training delivery providing a wide array of support to the Department of Defense CONUS and OCONUS. Kapsuun Group (KG) has grown quickly into an established leader in software engineering, training, and intelligence. We are a customer-focused partner for mission critical enterprise with a proven track record of excellence. Kapsuun Group provides Federal agencies and DOD with software engineering, intelligence, language services, training, E learning, records management, personnel services, communications, and electronics maintenance. In October 2020, our sister company Chenega International Consulting merged with Kapsuun Group to help meet the increasing global demand for ethical, effective law enforcement training, capacity building, analytics, mentoring, and specialist security innovation.

## Capabilities

### Intelligence

KG provide studies and analyses, language and analytical support, Cyber, technology planning, and capability assessments to support various functions. We also support numerous initiatives, including research services and technical support, program assessments and evaluations, trend analysis, and subject matter expertise.

### Training & eLearning

KG currently supports numerous programs for our clients involving curriculum development, in-classroom, virtual, distance learning, simulation education, and training delivery analysis. We specialize in criminal justice sector reform, including law enforcement training, capacity building, analytics, mentoring, and specialist security innovation and advice. We have an academic partnership with Ulster University and will soon bring our law enforcement training platform to market.

### Language Services

We provide English Language Training (ELT) CONUS and OCONUS, as well as transcription, translation, and linguistic analysis.

### Software Engineering

We offer solutions in software integration, administration, development and deployment, cloud migration and integration libraries to allow your IT to work for your programs, not against them.

### **Records Management**

KG offers our customers answers for their assets, not complications. We provide physical storage, e-records digitization, retention and disposition action, electronic systems assessment, strategic planning, policy development, and training development and delivery.

### **Personnel Services**

We provide alignment, clarity, and direction as well as project planning, acquisition support, program management, and resource management to ensure that the best people are working on the best projects to achieve the best results.

### **Communications & Electronics (C&E) Maintenance**

KG provides integrated logistics support in the service of high-value, technically complex inspection, detection, and surveillance devices. Our services include equipment inventory management, corrective and preventative maintenance, and repair.
